

CTOR Academy mission is to train and update oral health providers on the latest advances of the different specialties, and encourage collaborations on diagnosis and treatment of challenging and multidisciplinary cases.

Its unique courses incorporate didactic online and onsite programs with pre-clinical and clinical training, to meet the needs of dental health professionals' continuing education.

## ORTHODONTIC ASSISTANTS COURSE

## FOR DENTAL ASSISTANTS

CTOR Academy offers an Orthodontic Assistant Professional Skills course that will help transition a Dental Assistant into an Orthodontics Assistant.

In this program, students will learn how to take excellent orthodontic records, fabricate removable appliances and retainers, deliver bands and change arch wires.

Students will also learn to communicate with patients on how to care for their appliances.

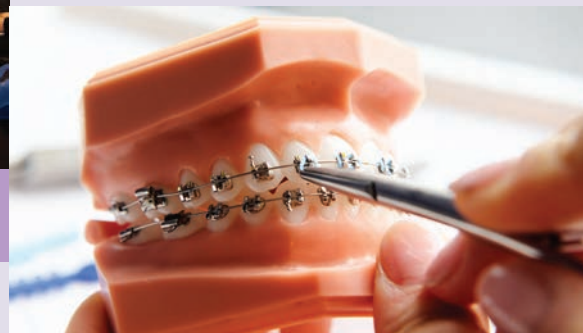

Students will have access to online modules that will give them an introduction into Orthodontic Assistant basic skills.

In addition to online modules, students will have 5 days of lectures and hands-on training on the following topics:

- How to take an alginate and PVS impression
- How to set up a patient
- How to take Orthodontics photos
- How to take intraoral digital scans
- Orthodontics materials and instruments
- Orthodontics terminology
- Orthodontics classification
- Separator and band placement
- Wire insertion and ties

## 1-MONTH EXTERNSHIP

At the completion of the course, students may enroll in an optional one month externship rotation in orthodontic private practices to apply and demonstrate competence in learned skills through real clinical experience in the field.
